Self Test Training - Cisco 300-101 Activation Download

The ultimate way to learn and practice for your certification exams and clear the exam first time. Question: Which two actions enable a router to be configured to use IPv4 address or IPv6 address? (Choose two.) A. If the routing protocol version is not specified, then the router selects the IPv4 address. B. If the routing protocol version is not specified, the router selects the IPv6 address. C. If the IPv4 address is specified, then the router selects the IPv6 address. D. If the IPv6 address is specified, then the router selects the IPv4 address. Correct Answer: DCExplanation: A router is automatically configured to use IPv4 or IPv6 addresses when it is enabled or when the routing protocol version is not specified. Question: What is the purpose of the private local IP address field in a route? A. The administrator can use this field to save a route. B. If the IP address is not found in the IP routing table, the route will be deleted. C. If the IP address is a subnet, the route will be generated and saved in the routing table. D. The administrator can use this field to save a route. Correct Answer: BExplanation: The private local IP address field is used to conserve the route and to ensure that the route is not lost if the IP address is not found in the IP routing table. Question: Which two features enable the IOS to change the use of IPv4 addresses? A. RFC 1918 support B. IPv6 address redundancy and IPv6 address auto-configuration C. Disable IPv4 address configuration D. Disable IPv6 address configuration Correct Answer: BExplanation: IPv6 address redundancy and IPv6 address auto-configuration enable the IOS to add an IPv6 address if the IPv6 address is not present in the routing table. Question: Which two procedures let an administrator disable the transport protocol or IP address configuration on a router interface? A. Interface configuration B. Administrative interface configuration C. Router interface configuration D. Router interface IP address configuration Correct Answer: DExplanation: Router interface IP address configuration allows an administrator to configure

an interface on a router for use with IP addresses, regardless of the protocol. This procedure is useful for both the static and dynamic routing protocols, such as RIP, OSPF, and EIGRP. Question: b7e8fdf5c8

Self Test Training - Cisco 300-101

The Cisco 300-101 exam simulates real Cisco 300-101 exams and contains questions that closely resemble the official Cisco 300-101 exam. The Self Test Training - Cisco 300-101 program offers you the possibility to practice on a stress-free simulator. Download Self Test Training - Cisco 300-101 Welcome to the official CCNA ROUTE 2.0 Practice Exam for Cisco 300-101 exam. The Cisco 300-101 is a reliable application that can offer you a comprehensive environment in which to practice for your certification exam. This program includes specialized question sets for users who wish to prepare for taking the Cisco IP Routing, ROUTE 2.0 certificate. Reliable exam simulator Not only does Self Test Training - Cisco 300-101 help you improve your knowledge on Cisco IP routing, but it also allows you to work in an exam simulation environment. The program features several question sets, each resembling the ones you can find at the official examination session. Each question includes several answering options, out of which there can be one or several correct versions. Additionally, some questions are accompanied by pictures or graphs, allowing you to test your knowledge in various situations. The exam simulation, which you can access by selecting Practice Mode, also includes a timer and allows you to view your score at the end of each test. Comprehensive learning methods Self Test Training - Cisco 300-101 is suitable for candidates who wish to take the exam and need to establish the ground for the acquired knowledge. The program includes several modules, namely the Learning Mode, Rapid Review and Assessment Test. Each of these options allow you to view the question and reveal the correct answer at any time you wish. Unlike Practice Mode, these modes do not feature a timer. However, similar to the exam simulator, you can review all the questions, before ending the test, as well as view a detailed report of your performance. Saving scores for future reference Self Test Training - Cisco 300-101 can save the scores for all the tests you take in Learning and Practice Mode. You may view these scores in the Exam History window and compare your performance over time. Moreover, you can change the passing score, layout style or the session timing, from the Preferences menu. Self Test Training - Cisco 300-101 Description: The Cisco 300-101 exam simulates real Cisco 300-101 exams and contains questions that closely resemble the official Cisco 300-101 exam. The Self Test Training - Cisco 300-101 program offers you the possibility to practice
